

GLEESON

TRUCK BODIES

Gleeson Truck Bodies

Gleeson Truck Bodies is one of the country's leading manufacturers of commercial truck bodies.

Gleeson was founded in 1968 by the Gleeson family. Since then we have grown and diversified, from a small agricultural equipment manufacturer, to a cutting edge truck body manufacturing company, offering a wide array of superior products throughout Ireland and the United Kingdom.

Today, we bring more than five decades of experience to the design & manufacture of all our bodies.

In line with the ethos of our parent company, Gleeson Steel & Engineering Ltd., we are 100% committed to offering the high spec, high quality & durable products that our customers have come to expect. Our commitment to manufacturing technologies, as well as highly skilled engineers, certified welders and production personnel, ensures that each product manufactured meets those customer's expectations.

All our staff work to ensure that each customer gets both the product and the service that they require.

With our highly trained staff of engineering and production professionals, we can assure our customers that they will get what they have asked for and be assured that their equipment will meet the highest standards in terms of safety and design.

Our tipper bodies utilize high strength steel to make them some of the most durable bodies in the industry.

They are suitable for:

- Heavy Duty Construction.
- They take on rock & demolition materials with ease.
- Suitable for Industrial & Quarry Applications.
- Suitable for transporting sand & gravel and all types of mixed aggregate.

E100 Half Pipe

The E100 half pipe, single skin tipper body is a full Hardox body, complete with a 5mm floor, 4mm sides, headboard and tailboard and an automatic tailboard. The top rail is 5mm and is profiled to ensure its strength. The body comes with a sub-frame as standard. The top lifting ram used increases stability when tipping. The contoured body is designed to optimize material discharge and allows for bulk material centering. The bolt together technology used eliminates the risk of weld fracture and fatigue.

The E100 is supplied into the market with a three year structural warranty on both the body and the tipping gear.

All our Gleeson tipping bodies are finished to the highest standard, each body being shot blasted, primed and finished to either single pack or two pack Polyurethane paint finish. All RAL colours and colour matching are available to our customers.

Please contact our sales office for full details of all options.

Optional Extras available on all Gleeson Bodies

- Two Pack paint finish.
- Automatic Opening Tailboard.
- On Board weighing system.
- Chapter 8 'Conspicuity' marking.
- Body raised warning system.
- Tool Box Storage.
- Electrically or manually operated sheeting system.
- Insulation in Sides and/or Floor.
- Chutes in Tailboard.
